

**NAME**

ofcotyp -- get office type

**SYNOPSIS**

```
ofcotyp(ofcnam)
char *ofcnam;
```

**DESCRIPTION**

Returns the integer office type for the office ofcnam. This can be used to index into the ofctyps(3) array to get the ASCII string describing the office type. Uses ofcdata(3) to access the oparm file.

**LIBRARY**

/lib/lib1.a

**SEE ALSO**

ofctyps(3)

**DIAGNOSTICS**

Returns -1 if cannot open the oparm file.
